

ASHWIN KUMAR UMA SANKAR

ufoundashwin@gmail.com | +1 (458) 272-4170 | 85282, Tempe, AZ | [Github](#) | [ashxinkumar.me](#)

SUMMARY

AI/ML and Frontend Engineer with 3.5+ years of experience in high-performance web and AI-integrated applications, specializing in Angular, React, Next.js, LLMs, RAG pipelines, AI-assisted automation, and cloud deployment (AWS/GCP/Azure), with a proven track record in optimizing performance, scaling systems, and contributing to AI research and open-source projects.

EDUCATION

MEng in Computer Science	Oregon State University – Operating System II, Algorithms	GPA: 3.7/4.0	09/2023 – 06/2025
BTech in Computer Science	Hindustan University – Cyber Security & Forensics Graduate	GPA: 3.6/4.0	06/2018 – 05/2022

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++

Web Development: Angular, React 18, Next.js, TypeScript, RxJS, NgRx, Vite, Tailwind CSS, Cypress

Database: MySQL, MongoDB, PostgreSQL, SQLAlchemy, Pinecone, Supabase, ElasticSearch, FAISS, ChromaDB, Firebase

Cloud: AWS (Lambda, S3, CloudFront), GCP (Kubernetes, Pub/Sub), Azure, Docker, CI/CD Pipelines, GitLab, GitHub Actions

AI & ML: TensorFlow, PyTorch, Keras, Hugging Face, LLaMA 3, Groq, RAG, NLP, OpenCV, Scikit-learn, SpaCy, Agents, MCP

Tools: Tableau, Streamlit, WebSocket, Lighthouse CI, Sentry, Nginx, Plotly, Edge Caching

Certifications: AWS Certified Solutions Architect, Python Data Structures and CI/CD & DevOps - University of Virginia

WORK EXPERIENCE

CLAW CODE

Arizona – Remote

Co-Founder

07/2025 – Present

- Developed an LLM to generator 2D/3D game using Phaser.js, Three.js, and Babylon.js with Node.js backend and Next.js frontend, integrating **fine-tuned 20B LLMs and RAG** pipelines, achieving playable game generation in **<1 minute** versus **3–4 minutes** for baseline models.
- Created custom datasets, base templates, and agent-based benchmarking for **60+ dynamic game scenarios**, outperforming Lovable/Base44 in speed, playability, and deployment, enabling live preview and one-click game launch.

OREGON STATE UNIVERSITY

Corvallis – Remote

Web Developer and Project Assistant

10/2024 – 06/2025

- Contributed to a **7-person** cross-functional remote team (developers + designers) in redesigning Oregon State University's 2025 web platform, delivering **40% faster load times** through responsive CSS optimizations, 50% longer user sessions via improved UX, and full WCAG 2.1 AA compliance across 625+ pages.
- Explored AI-assisted development by integrating GitHub Copilot and fine-tuning LLaMA to automate boilerplate code, speeding up feature delivery by 30%.

KIVI

IITM Research Park, Chennai

Associate Software Developer

06/2022 – 08/2023

- Built **20+** Angular/React Native apps for **20K+ MAUs** featuring land analysis tools and digital banking with **<800ms latency**.
- Integrated secure fintech workflows using Equifax, DocuSign/Razorpay and OAuth 2.0/JWT, processing **2K+** daily transactions. Automated CI/CD pipelines using **GitLab/GitRunners**, cutting deployment times by 30% while reducing errors.

GENWORKS

Wipro, Bangalore

Data Analyst Consultant

01/2022 – 05/2022

- Streamlined **10+ MongoDB and MySQL databases** by restructuring schemas and collaborated with engineering to migrate legacy datasets to AWS DynamoDB, reducing query latency **by 40% for faster dashboard loads**.
- Developed Python scripts to sync product, customer, and transaction data with built-in automated validation checks, enabling real-time dashboards with **<2s refresh rates**.

PROJECTS

AI-Native Frontend Innovations | LLaMA 3, RAG, TensorFlow.js, NLP

- Built AI-powered developer tools including SnappyPilot, a LLaMA-3 **Git issue generator** for VSCode/CLI; SnipperScrapper, a Chrome extension using RAG for 87% accurate **code solutions from Stack Overflow and Medium**; and TaskPilot AI, an AI **task manager with auto-priority scheduling**, improving planning speed by 65%. [Live Demo](#)

Performance at Scale – Emergency Route System | AWS Lambda, Edge Caching

- Developed a low-latency crisis routing system achieving **<400ms response time**, leveraging AWS Lambda and edge caching for scalable, real-time performance in high-pressure scenarios. [Live Demo](#)

Open-Source Contributions | Python, Angular, AI, DevOps

- Enhanced the **SCARR Framework**, optimizing Python algorithms by 30% using Numba/VTune to process **300GB LRA data**.
- Maintained **50+ repositories** across Angular, AI, and DevOps projects, contributing over **500 commits** and improving code quality and scalability. [Live Demo](#)
